Tools and Solution.

PROJECTS:

- My graduation project "TrainMe" is an online reservation system that should resolve a problem of difficulty of learning how to drive for women who are either in remote areas where they don't have driving schools or women having a busy schedule that needs flexible training hours which can be achieved by getting a personal trainer.(swift programming language used through Xcode IDE)
- "Charity" is my SW engineering Project(Documentation Project),directed to those who wish to donate in a safe and legal way. It helps you to decide which donate you want to give and which charity receive your donation.By collecting all charities around Majma'ah city in one app.
